Summary

The RPM Building Solutions Group (BSG) is committed to protecting the environment, preserving the health and safety of our employees and communities, and assuring the safe operations of our processes. As such we continue to work to reduce the use of Isophorone Diisocyanate. Isophorone Diisocyanate (CAS ID – 4098-71-9) is used to in the formulation of Waterproofing, Sealants, Adhesives and Coating materials.

Options Implemented

While Tremco continues to utilize spill and leak protection, careful purchasing and regular training and supervision of operators there is not an expectation for reduction in use. We will however take all necessary steps to use the material in an environmentally responsible manner.

Timelines

The Safe handling of IPDI is an ongoing process.

As of December 13, 2013, I certify that I have read the toxic substance reduction plan for Isophorone Diisocyanate and am familiar with its contents, and to my knowledge the plan is factually accurate and complies with the Toxics Reduction Act, 2009 Ontario Regulation 455/09 made under the act.

 Paul A Valadao
Director of Canadian Operations
